PAKGEOLITH · STRATEGY BRIEF

Buyers, Pricing & Go-to-Market

PakGeoLith prices trust in two currencies

Prepared 3 November 2026 · Research-based proposal, not final pricing · Exchange rate used: USD 1 = PKR 280
All prices labelled "New" are proposals; benchmarks are linked to their sources.

Executive summary

↑ Back to contents

The bottom line. PakGeoLith's old prices fit a consumer app, not a professional data and trust service. The subscriptions cost PKR 5,000–10,000 a year (about USD 18–36), a compliance report cost PKR 30,000 (about USD 107), and auctions charged a flat PKR 5,000 per lot. The cheapest global retail mining-data product, Opaxe Standard, costs USD 10 a month (Opaxe). Mining Intelligence starts at **USD 4,400 per user per year** (Mining Intelligence). UK automated geology and mining desktop reports cost **GBP 39–199 each** (Groundsure). Online gem auctions take **12.5% from the seller plus 9% from the buyer** (Catawiki). This report proposes two price lists for every product. The **USD international list** sits at or a little below global benchmarks and is for foreign companies, investors, DFIs and exporters. The **PKR local list** is for Pakistan-resident buyers. It runs at about 20% of the USD price for individuals, 30–40% for SMEs and reports, and 50–60% for corporates. Global SaaS sells in Pakistan at 15–40% of US list prices (ProPakistani; Spotify PK), which supports those ratios.

What changes the most. - **Subscriptions** become a six-step ladder, from Free to Enterprise. Each tier gets a stated AI-assistant allowance, and premium map layers are sold as add-ons. - **Point-geology tests and 5 km briefs** get their own prices, set using the UK's Groundsure as the benchmark. - **The T1–T5 satellite surveys** get USD prices of USD 1,500–25,000+. Even the top tier costs much less than the airborne survey a client would otherwise have to fund. - **Compliance screening** becomes a three-level product: a quick check, a standard report and a transaction-grade memo. - **The marketplace** moves from flat fees to percentage commissions, escrow and pass-through charges. On a USD 50,000 chromite lot, platform revenue rises from about USD 18 to about USD 1,300.

Who pays. Money comes mainly from: - domestic corporates and SOEs entering hard-rock mining; - foreign juniors and investors; - banks, DFIs and law firms; - in time, provincial governments.

Mine owners matter most as **sellers and data contributors**. End buyers of minerals, such as steel, cement, ceramics and jewellery firms, are the demand that makes sellers join.

What to do now. PMIF26, the government's minerals investment forum, takes place in Islamabad on **12–13 November 2026**, nine days from today (ProPakistani). PakGeoLith should arrive with: - the USD price sheet; - a clean sample report; - an honest positioning line: "Pakistan's integrated mineral-intelligence platform", not "the only one in the world".

Exchange rate used: USD 1 = PKR 280 for every conversion in this report. The interbank rate was about PKR 276.8 on 23 October 2026 (PakTribune), so PKR 280 includes a small buffer. Inflation is back above 10% (pkrevenue.com), so the PKR list should be reviewed every 6–12 months.

How to read this

↑ Back to contents

#	Section	What you get
1	Positioning and how the money works	The business in one page and the revenue engines
2	Buyer directory	One card for each of 10 buyer, user and partner types: who they are, what they need, what we sell, what they pay, how to reach them, priority
3	Complete price list	Every product with old price, new USD price, new PKR price and benchmark
4	Worked examples	What five typical customers would actually pay
5	Go-to-market, condensed	Competitors, government routes, channels and events, 90-day plan
6	Risks and what to verify before joining	The checks to make before committing
7	Conclusion	What the repricing changes
8	One-page price list	All prices on a single page

Labels used in every price table. - **All PakGeoLith prices in this report (the "New USD" and "New PKR" columns) are proposals.** They are not quotes found in the market. - The **"Benchmark" column contains sourced figures**, linked to their source. - **"(inference)"** marks an estimate the research team made from those sources. - **"Old"** is the price on the current website. It is given for reference only. - Prices in other currencies are converted at approximately GBP 1 = USD 1.30, AUD 1 = USD 0.65, EUR 1 ≈ USD 1.08 and INR 87.5 = USD 1. These conversion rates are working approximations and were not taken from a source.

1. Sell trust, price twice, take a percentage

↑ Back to contents

PakGeoLith brings together in one product: - a geology and mineral-occurrence atlas; - multi-province tenure data (who holds which licence); - a mining-law register; - an Urdu/English AI assistant; - satellite targeting reports; - a marketplace.

The defensible part is not the satellite imagery. Free NASA EMIT, Landsat, Sentinel and ASTER data are available to anyone (JPL), and SUPARCO launched its own hyperspectral satellite in October 2025 (Dawn). What is hard to copy is the **cleaned tenure and law data, interpreted for a specific deal, from a platform that also verifies sellers and holds payments**.

Three pricing rules follow from this. - **Price interpretation, not lookups.** A raw registry search is almost free worldwide: Western Australia charges about AUD 10.60 (WA DMIRS) and Punjab land records charge PKR 900 (ProPakistani). Interpretation is where the value is, and law-firm title opinions start at about USD 5,000 (forum estimate, weak). - **Price foreign and corporate clients in USD.** The rupee has been stable, but inflation is above 10% and the State Bank raised the policy rate to 12% on 27 October 2026 (pkrevenue.com). USD export revenue may also qualify for the 0.25% final tax on IT exports, which runs until June 2029 (CW Pakistan). A tax adviser needs to confirm whether PakGeoLith's reports count as IT-enabled services. - **Earn a percentage only where we carry risk or do work.** Verification, assay coordination and escrow justify a commission. A plain listing does not.

Revenue engine	Who pays most	Pricing logic	When it pays
Reports (briefs, compliance, T1–T5 surveys)	Corporates, foreign juniors, lenders, law firms	Per item; USD list ≈ global, PKR list ≈ 30–40%	Now
Subscriptions + AI + layers	Professionals, investors, teams	Per seat per year, AI allowance included	0–6 months
Law register	Law firms, banks, compliance teams	Per organisation per year	0–6 months
Enterprise / API	Banks, DFIs, majors, consultancies	Annual contract	6–12 months
Government licences / portals	Provincial mines departments, SIFC/PMIF, GSP	Annual licence under PPRA thresholds; portals by tender	6–18 months
Marketplace	Licensed sellers and buyers	Membership + commission + escrow + pass-throughs	9–18 months, after escrow partner

2. Buyer directory: who pays, for what, and how to reach them

↑ Back to contents

The table below summarises all ten groups. A card for each group follows. The priority is a judgement about **near-term revenue for effort**. P1 means sell now, P2 means build in the next 6–12 months, and P3 means nurture.

Buyer type	Main thing we sell them	How we make money	Priority
(a) End mineral buyers	Verified supply with assay and escrow	Buyer escrow share, buyer's premium, KYC fee	P3 now, P1 once escrow is live
(b) Bulk buyers, traders, importers/exporters	Verified sellers, grade data, RFQs	Commission, escrow, featured listings, exporter membership	P2
(c) Mine owners and licence holders	Compliance reports, seller membership	Reports, membership, commission; data in exchange for discounts	P2 (volume)
(d) Domestic mining companies and SOEs	Enterprise seats, T3–T5 surveys, portfolio compliance	Annual licences plus reports	**P1**
(e) Foreign mining companies and juniors	USD surveys, Pro Plus seats, title screening	USD reports and subscriptions	**P1**
(f) Foreign investors, funds, overseas Pakistanis	"Verify before you invest" packs	Briefs, compliance, Pro Plus	P2
(g) Banks, DFIs, insurers, law firms, consultants	Law register, transaction-grade title memos, API	Institutional licences plus reports	**P1**
(h) Government (federal and provincial)	Data licences, white-label portals, pilots	Annual licences, portal builds, revenue share	P2 (slow, large)
(i) Universities, students, independent geologists	Cheap seats, site licences	Small fees; credibility and referrals	P3
(j) Channel partners, resellers, associations	Member discounts, referral commissions	Volume through partners (we pay them)	P2 (enabler)

(a) End mineral buyers: they just need the mineral

Field	Detail
Who	Factories and shops that use a mineral rather than trade it. Examples: a steel or ferrochrome plant that needs chromite, a cement plant that needs limestone or gypsum, a ceramics or glass factory that needs feldspar, china clay or silica sand, and a jeweller who needs emeralds, rubies or tourmaline.
Need / pain	Consistent grade, a seller with a real licence, and no paying in advance for goods that never arrive. Gem buyers worry about fake certificates, and online buyers report Pakistani sellers reusing copied certificates (Gem Society forum).
What we sell	A buyer account, an RFQ ("request for quote") board, licence-verified sellers, an assay or gem-lab certificate on each lot, and escrow.
How we earn	Free buyer account. Verified-buyer KYC is USD 25 or PKR 2,500 one-off. The buyer pays half the escrow fee (0.6–2.0%) and a **5% buyer's premium on gem auctions**. Lab fees are passed through with a 10–15% handling margin.
How to reach	Gem buyers: the Tucson AGTA GemFair (31 Jan–4 Feb 2027), the March Hong Kong show, and PGJDC exhibitions (InStore; PGJDC). Industrial buyers: procurement teams, contacted directly.
Priority	P3 until escrow and assay work, then P1. Without these buyers, sellers have no reason to pay.

(b) Bulk and raw-material buyers, traders, exporters and importers

Field	Detail
Who	Chromite, marble, coal and gypsum traders, Pakistani exporters, and Chinese importers. Chromite exports to China were **USD 89.43M in 2025** (Aaj). Pakistan is China's third-largest supplier of construction stone (ProPakistani).

Field	Detail
Need / pain	Finding licensed sellers at volume, grade disputes, and checking documents before an LC is opened.
What we sell	A seller and supplier directory with licence status, grade-tagged listings, assay coordination with sealed-sample chain of custody, escrow or LC support, and featured placement for exporters.
How we earn	Bulk commission of **1.0% up to USD 50k and 0.5% above** (minimum USD 50 or PKR 10,000). Escrow at 0.6–2.0%. Exporter Seller membership at USD 5,000 or PKR 600,000 a year. Category sponsorship at USD 1,000 or PKR 200,000 a year.
How to reach	Exporters directly. Chinese importers through the exporters who already sell to them, Chinese-language listing pages, and the China-facing Pak-China E-Mining Platform launched in January 2026 (Asia News Network), which could be a partner or a competitor.
Priority	P2. The volume is real, but these traders will cut us out of later deals unless escrow and assay add value.

(c) Existing mine owners and licence holders

Field	Detail
Who	KP alone has **4,917 mineral titles** (ARY News), so there are probably 10,000–15,000 nationally (inference). Most are small marble, coal, chromite, gypsum and gem operators.
Need / pain	Rent and royalty shocks: KP owners are protesting a 400% surface-rent rise and 765 sites made inaccessible (APP). Also proving title when selling, transferring or borrowing, and finding buyers.
What we sell	(1) **As customers**: licence-status checks, compliance reports and portfolio alerts. (2) **As sellers**: verified seller membership and listings. (3) **As data contributors**: they upload lease documents, production and assays in exchange for discounts or credits. This builds the tenure dataset, including for Balochistan, where no public cadastre was found.
How we earn	Standard compliance report at PKR 45,000, or **PKR 30,000 through member associations** (the old price is kept as a member rate). Verified Seller membership at PKR 50,000 a year. Commission when they sell. Data contributors get 20% off reports (proposal).
How to reach	Associations: the Frontier Mines Owners Association, the All Pakistan Marble Industries Association, the Hazara mine owners and APCEA for gems (APP). Urdu and Pashto YouTube and Facebook ads that open a WhatsApp chat. Facebook reaches **52.9M** people in Pakistan and YouTube **54.3M** (DataReportal).
Priority	P2. There are many of them, but they are price-sensitive. Sell around transaction events: a sale, transfer, loan, dispute or renewal.

(d) Domestic mining companies and SOEs

Field	Detail
Who	OGDCL (a Reko Diq partner, with an antimony joint venture planned with PMDC), PPL (exploration licence EL-331 in Chagai), Mari Minerals (an 87.5% stake in Chagai licences, with 49% being farmed out to Fatima-linked Globacore), PMDC, NRL, FWO-linked entities, and cement groups that hold limestone leases (Profit; Profit; Profit).
Need / pain	Oil and gas companies are new to hard-rock minerals. They need to know where to apply or farm in, the title history of a partner's licences, and the surrounding tenure.
What we sell	An Enterprise licence, T3–T5 surveys, transaction-grade compliance memos, portfolio monitoring, and the law register.
How we earn	Enterprise at **PKR 2.5M a year** (USD 15,000 if invoiced to a foreign affiliate). T4 at PKR 1.0M and T5 from PKR 2.5M. Transaction-grade memo at PKR 150,000. Enterprise clients get 20% off reports.
How to reach	PMIF26 meetings. OGDCL is PMIF26's founding partner, and PMDC, PPL and FWO are exhibitors (ProPakistani). Exploration heads and business-development teams, contacted directly.
Priority	**P1.** They have cash, they are new to the sector, and they can be reached in nine days.

(e) Foreign mining companies and juniors

Field	Detail
Who	Barrick (Reko Diq), US Strategic Metals (about USD 500M first phase, with MoUs with FWO), Nova Minerals, Saudi Manara, Chinese operators, and juniors attracted by PMIF26 (ProPakistani; ProPakistani).
Need / pain	The biggest information gap of any group: which ground is open, who holds it, which rules apply, and where the targets are. They are used to paying for data.
What we sell	USD surveys (T2–T5), Pro Plus or Team seats, title screening, the law register in English, a commercial imagery add-on, and a referral to a Competent Person firm for a JORC or NI 43-101 upgrade.
How we earn	**T3 at USD 7,500, T4 at USD 12,000, T5 from USD 25,000.** Pro Plus at USD 1,500 a year. Transaction-grade memo at USD 1,200 per licence. Imagery is passed through at cost plus 20%.
How to reach	PMIF26, then the Future Minerals Forum in Riyadh (12–14 Jan 2027), Mining Indaba (8–11 Feb 2027) and PDAC in Toronto (7–10 Mar 2027) (Global Mining Review; PDAC). LinkedIn has 18M users in Pakistan (DataReportal).
Priority	**P1.** Highest value per deal. Buyers will compare us with Fleet Space and Farmonaut, so the reports must be clearly good.

(f) Foreign investors, funds and overseas Pakistanis

Field	Detail
Who	Gulf, Chinese and Western funds looking at Pakistani minerals, and diaspora investors. Roshan Digital Account inflows reached **USD 14.16B cumulatively** by September 2026 (APP).
Need / pain	Remote verification. Fraud is a real risk: a fake investment company in Gilgit-Baltistan took Rs240M from about 700 people (Profit).
What we sell	A "Verify before you invest" pack: a reviewed 5 km brief, a transaction-grade title memo and a 3-month Pro Plus seat. Funds can also buy Team seats and T2–T3 surveys.
How we earn	Pack at **USD 1,950**, against USD 2,100 bought separately (USD 450 brief, USD 1,200 memo, USD 450 for three months of Pro Plus). PKR pack for local relatives or partners: PKR 200,000. Pro Plus at USD 1,500 a year.
How to reach	Riyadh FMF, LinkedIn, diaspora professional networks and Overseas Pakistanis events (not researched in detail). Partner law firms.
Priority	P2. The diaspora segment is speculative, but the product is cheap to package.

(g) Banks, DFIs, insurers, law firms and consultants

Field	Detail
Who	IFC/World Bank, ADB and US EXIM, which together provide over **USD 2.6B of Reko Diq financing** (ProPakistani). Also Pakistani banks lending against mining collateral, insurers, and PMIF26's knowledge partners Milbank, White & Case and Lazard (ProPakistani). Consultancies and E&S advisers.
Need / pain	Title diligence on collateral and deal targets, keeping up with regulatory change, and E&S and tenure-conflict mapping around projects they finance.
What we sell	Law Register Institutional, transaction-grade title memos with express turnaround, an Enterprise licence or API, and portfolio monitoring.
How we earn	Register Institutional (10 users) at **USD 7,500 or PKR 400,000 a year**. Memo at USD 1,200 or PKR 150,000, with +50% for express. Enterprise at USD 15,000–40,000. API from USD 10,000 a year.
How to reach	PMIF26 knowledge-partner sessions, bank credit and risk heads, bar associations, and Lexology-style legal content marketing.
Priority	**P1.** They have high willingness to pay and act as reference customers that build trust.

(h) Government: federal and provincial

Field	Detail
Who	Federal: **SIFC** (convenes and unblocks), the **Petroleum Division** (policy, the National Minerals Data Centre, PMIF), **GSP** (geological data, which it also buys), **SUPARCO** (HS-1 satellite data, and offers its own geology service), and **PMDC** (state miner). Provincial: the mines and minerals departments of KP, Punjab, Balochistan, Sindh, Gilgit-Baltistan and AJK. Provinces own minerals and grant titles (CSIS).
Need / pain	Pakistan's geodata is "outdated, fragmented, or insufficiently accessible to investors" (ResearchGate). Provinces want investor-facing data and revenue.
What we sell	A no-cost pilot or MoU, then a data licence, a white-label investor portal, a PMIF or SIFC investor data room, digitisation of legacy reports with revenue sharing, and training.
How we earn	Provincial data licence at **PKR 2.9M a year**, which keeps it under the PPRA Rs3M advertising threshold (PPRA). White-label portal at PKR 10–15M setup plus PKR 5–10M a year, tendered. Revenue share of 30–50% on data sold to investors.
How to reach	SUPARCO-style MoU (the E-Agri model) (ProPakistani), PMIF26 procurement briefings, and an unsolicited proposal under PPRA (ProPakistani).
Priority	P2. These are the largest contracts but take the longest. The state is also a competitor.

(i) Universities, students and independent geologists

Field	Detail
Who	Geology departments at NUST, the University of Peshawar and UET (PMIF26 academic partners), their students, and freelance geologists and GIS specialists, many of whom work on Upwork (Upwork).
Need / pain	Affordable data for theses and client work. Domestic geologists earn about PKR 650,000 a year on average (Payscale).
What we sell	Student Explorer at half price, a university site licence, and the Professional tier for freelancers. Freelancers can also join a field-partner panel for ground-truthing and resell our briefs.
How we earn	Student plan at PKR 3,000 a year. Site licence at **PKR 150,000 a year** (USD 1,500 for foreign universities). Freelancers pay for Professional at PKR 35,000 and earn a 20% referral commission.
How to reach	Department heads, student geology societies, field-ambassador programmes and PMIF26's technical paper sessions.
Priority	P3 for revenue, but **high for credibility**: they provide advisory-board members, case studies and future buyers.

(j) Channel partners, resellers and associations

Field	Detail
Who	Mine-owner and trade associations (FMOA, APMIA, APCEA), PGJDC, law and accounting firms, GIS consultancies, payment and escrow partners (a bank trustee account or Safepay), and the Competent Person firms that can turn our work into JORC or NI 43-101 reports.
Need / pain	Associations want benefits for members. Firms want products they can resell or bundle.
What we sell	Member pricing, white-label briefs and co-branded reports.
How we earn	We pay them, and they bring volume. Proposed terms: associations get 20–33% off for members plus a 10% revenue share; resellers get 25% off list on reports and 20% of the first-year subscription; referrers get 10% for 12 months. Farmonaut runs a similar affiliate programme (Farmonaut).
How to reach	Sign one or two association MoUs in weeks 6–10. Approach law firms through PMIF26.
Priority	P2. This is the cheapest way to reach thousands of small owners.

3. The complete price list, item by item

↑ Back to contents

Pricing rules that apply to everything

- **Currency.** Foreign buyers, multinationals and exporters pay the **USD list**. Pakistan-resident individuals, SMEs and corporates pay the **PKR list**. All conversions use PKR 280.
- **Taxes.** PKR prices **exclude provincial sales tax on services**: 16% in Punjab and ICT, 15% in Sindh and KP, with reduced IT rates possibly applying (ConSerIC; lookuptax). Commission income attracts **12% Section 233 withholding for filers** (PKRevenue).
- **Indexation.** Multi-year PKR contracts carry a CPI escalator of about 10% a year (inference).
- **Billing.** Annual billing gets two months free. Payment by debit card, Raast, IBFT or bank transfer. Only about 4% of Pakistan's 61M payment cards are credit cards (SBP).

3.1 Subscription tiers, AI allowances and premium layers

Old prices were PKR 5,000 a year (standard) and PKR 10,000 a year (top tier). The benchmarks below are per year unless stated.

Tier (who)	New USD	New PKR	What's included	Benchmark (sourced)
Free (anyone)	0	0	Basic geology and occurrence layers; 1 point test a month; AI 50k tokens a month	EOS LandViewer Starter is free (EOS)
Explorer (students, small owners)	12/mo or 120/yr	600/mo or 6,000/yr	All public layers, tenure view, law-register titles; 5 point tests a month; AI 500k tokens	Opaxe Standard USD 10/mo (Opaxe); ChatGPT Go PKR 1,400/mo; Canva Pro PKR 9,200/yr (Pakera)
Professional (consultants, serious owners)	49/mo or 490/yr	3,500/mo or 35,000/yr	Plus premium layers, full law-register text, 2 automated 5 km briefs a year, 500 record exports; AI 2M tokens	LandViewer Pro USD 49.99/mo; Opaxe Essential USD 50/mo (EOS; Opaxe); PPP band PKR 3,000–4,500/mo (inference)
Pro Plus / Investor (1 power seat)	150/mo or 1,500/yr	12,000/mo or 120,000/yr	Plus Law Register Pro, 6 briefs a year, 1 standard compliance report a year, 10% off surveys; AI 5M tokens	Mining Intelligence USD 4,400/user/yr (Mining Intelligence); Sentinel Hub Basic EUR 125/mo (toolfox)
Team (5 editors + 25 viewers)	249/mo or 2,490/yr	20,000/mo or 200,000/yr	Pro Plus features, 12 briefs a year, 15% off reports; AI 15M tokens pooled	Felt Team USD 199/mo yearly or 249 monthly, with 3 seats, 25 viewers and AI credits (Felt)
Enterprise (25+ users)	See 3.6	See 3.6	Everything, SSO, API option, 20% off reports; AI 50M tokens pooled	See 3.6

How the AI allowance works. Allowances are shown to users as tokens and as an approximate number of questions. The working assumption is about **4,000 tokens per answer** that draws on law text or briefs (assumption, not sourced). On that basis, 500k tokens is about 125 questions and 2M is about 500. The default model is a low-cost "mini-class" model, which costs PakGeoLith about **USD 0.78 (PKR 215) per 1M tokens**. A premium model costs about USD 4.40 per 1M (inference from AnotherWrapper prices), so premium-model use **counts at 5x** against the allowance. Hard caps apply. Even at Team level, the AI cost stays below 25% of the price.

AI add-on	New USD	New PKR	Benchmark
Top-up, 1M standard tokens	5	1,000	About 4.6x the mini-model cost; the research suggests pricing at 3–5x cost (inference)
Top-up, 10M standard tokens	40	8,000	Volume discount on the above

AI add-on	New USD	New PKR	Benchmark
"Mining-law copilot" seat add-on (premium model, 3M tokens)	39/mo	3,000/mo	ChatGPT Plus about PKR 5,700/mo; CoCounsel Core about USD 225/user/mo (ProPakistani; CostBench)

Premium map layers. These are included from Professional upwards and sold as add-ons on Explorer. There is no old price.

Layer pack	New USD	New PKR	Benchmark
Tenure history and title-change alerts	10/mo or 100/yr	1,000/mo or 10,000/yr	Landgate meters tenure data at AUD 4 per 10 records (Landgate)
Satellite alteration and structure layers (ASTER/EMIT-derived)	10/mo or 100/yr	1,000/mo or 10,000/yr	LandViewer charges USD 30/mo more for Pro over Explorer (EOS)
Access, forest and restricted-area overlay	10/mo or 100/yr	1,000/mo or 10,000/yr	Same anchor (proposal)
Balochistan tenure layer (when built)	25/mo or 250/yr	2,500/mo or 25,000/yr	Scarcity premium; no public Balochistan cadastre was found (CSIS)
Bulk tenure export, per 100 records	20	2,000	Landgate AUD 4 per 10 records is about USD 26 per 100, plus an AUD 213/hr extraction charge (Landgate)

3.2 Point-geology tests and 5 km point-intelligence briefs

There is no old price recorded. The closest analogue is Groundsure's UK automated reports (Groundsure).

Product	New USD	New PKR	Benchmark (sourced)
Point-geology test (one coordinate: rock unit, nearest occurrences, licence status)	25	2,500	GeoRisk certificate GBP 16.50 (about USD 21); CON29M coal search GBP 41.60 (about USD 54)
5 km brief, automated (geology, occurrences, tenure, access, rules within 5 km)	120	15,000	Geo Insight GBP 38.95 (about USD 51); Metalliferous Mining Search GBP 75 (about USD 98); Enviro Insight GBP 111 (about USD 145)
5 km brief, geologist-reviewed (adds annotation and a one-page plain-language summary)	450	60,000	Groundsure Screening GBP 310 (about USD 403); Review GBP 425.60 (about USD 553)
Brief credit pack (10 automated briefs)	1,000	125,000	Volume discount (proposal)

The UK market prices commercial reports at about **twice** residential ones. That supports a lower PKR list for local owners.

3.3 Satellite remote-sensing surveys T1–T5, report packages and add-ons

The old prices were T1 PKR 150,000, T2 PKR 375,000 (10 analyst-days), T4 PKR 950,000 (sample: about 30 km² across three blocks) and T5 up to about PKR 1M (the top of the advertised range). T3 was not recorded. The definitions below are proposals and should be aligned with the website's tier definitions.

Tier (scope)	New USD	New PKR	Benchmark (sourced)
T1 Desktop screen: 1 block, 10 km² or less, free multispectral data, about 3 analyst-days	1,500	150,000	International junior geologists charge USD 500–600 a day (Mining.com); India's IBM charges INR 8,710 (about USD 100) a day for a senior officer (IBM)
T2 Alteration mapping: 25 km² or less, about 10 analyst-days	4,000	400,000	10 days at USD 400 (inference). The old T2 already worked out at about USD 134 a day

Tier (scope)	New USD	New PKR	Benchmark (sourced)
T3 Multi-sensor targeting: 50 km² or less (ASTER, EMIT, Sentinel-1 structure), ranked targets	7,500	650,000	Commercial vendors (Farmonaut, Fleet Space, VRIFY) quote per project and publish no prices (Farmonaut)
T4 Integrated prospectivity: 100 km² or less or up to 3 blocks, with tenure and law overlay and a field plan	12,000	1,000,000	Helicopter magnetics costs USD 35–100+ per line-km (Springer); a 50 km² block costs about AUD 150–250k by helicopter or AUD 60–100k by drone (MinerMundo)
T5 District or portfolio: over 100 km², custom, optional commercial data and field partner	from 25,000	from 2,500,000	Same anchors. Fugro won a €10M Punjab exploration contract in 2017 (GeoConnexion)

Why the USD list can rise this far. Scaling the blog figures, a magnetics survey of the sample T4's 30 km² would cost about USD 23–39k by drone or USD 58–98k by helicopter (inference). A USD 12,000 satellite study is a small fraction of the first piece of fieldwork it helps target. The PKR list rises less, because the old T2 already worked out at about USD 134 per analyst-day. That is above the South Asian public-sector rate of about USD 100 a day.

Report package or add-on	New USD	New PKR	Benchmark (sourced)
Library report access (one existing regional report from the catalogue)	295	25,000	GlobalData single mining report about USD 995 (GlobalData); IBM preliminary geological appraisal INR 26,460 (about USD 300) (IBM)
GIS data pack (shapefiles and rasters) with a survey	+15% of tier	+15% of tier	Proposal
Extra user licence for a delivered report	+10% of tier	+10% of tier	Proposal
Express turnaround (half the standard time)	+50%	+50%	Punjab land records charge 4.4x for express (ProPakistani)
Commercial imagery: WorldView-3 SWIR	Cost +20%: archive about USD 30.60/km², tasking USD 40.80/km², 50 km² minimum (from about USD 1,530)	Same at PKR 280 (from about PKR 428,000)	USD 25.50 (archive) and USD 34 (tasking) per km², 50 km² minimum (LandInfo)
Commercial imagery: hyperspectral tasking	Cost +20%: about USD 7.20–10.80/km², 100 km² minimum (from about USD 720)	From about PKR 202,000	Planet Tanager USD 6–9/km² (SkyWatch); Pixxel VNIR USD 8/km² (Pixxel)
Commercial imagery: very-high-resolution archive optical	Cost +20%: about USD 10–31/km²	Same at PKR 280	50 cm archive USD 8–18/km²; 30 cm USD 17–26/km² (Farmonaut citing GeoPera)
Field verification day (geologist plus sampling, security extra)	500/day + costs	25,000/day + costs	International rate USD 500–600 a day; local fully loaded about PKR 15–20k a day (inference)
Competent Person review or JORC/NI 43-101 upgrade	Partner quote +10%	Partner quote +10%	No sourced fee was found

3.4 Per-licence compliance and title screening

The old price was PKR 30,000 per report.

Product	New USD	New PKR	Benchmark (sourced)
Licence status check (automated: holder, status, dates, area)	30	3,000	WA tenement register search AUD 10.60 (about USD 7) (WA); Punjab land-record copy PKR 900 standard or PKR 4,000 express (ProPakistani)

Product	New USD	New PKR	Benchmark (sourced)
Standard compliance and title screening report (status, rent and royalty obligations, rule cross-reference, risk flags)	450	45,000 (association members 30,000)	About 3–10 local consultant-days (inference); the research range was PKR 50–150k or USD 150–700 (inference)
Transaction-grade title memo (title chain, encumbrances, overlaps, lawyer-ready, for a sale, JV or loan)	1,200	150,000	Law-firm title opinions USD 5,000–50,000 (forum, weak); the KP title assignment fee is reportedly PKR 500,000 (unverified)
Express (48 hours)	+50%	+50%	Punjab land records charge 4.4x for express
Portfolio monitoring, per licence per year	120	12,000	WA tenement summary free, official extract paid (DMIRS); proposal
ESG and adverse-media screen of a licence holder	150	15,000	RepRisk company report about USD 150 (Energy-XPRT)

Every report should say it is **"pre-legal screening, not a legal opinion"**.

3.5 Mining-law and regulatory register

There is no old price recorded. Basic reading access is included from Professional upwards.

Product	New USD	New PKR	Benchmark (sourced)
Register Pro (per organisation, 3 users: consolidated rules, change alerts, Urdu/English summaries, AI Q&A)	2,400/yr	120,000/yr	PakistanLawSite costs PKR 36,000/yr domestic and USD 700/yr international (PakistanLawSite), so its international price is about 5.4x domestic
Register Institutional (10 users, API alerts, quarterly briefing)	7,500/yr	400,000/yr	Lexis+ about USD 80–135/user/mo, or USD 250–550 with AI (aitoolsatlas); Regology about USD 1,700/user/mo (SoftwareFinder)
Single-province rule pack (one-off PDF with updates for 3 months)	150	12,000	Proposal

3.6 Enterprise and API licences

There is no old price recorded.

Product	New USD	New PKR	Benchmark (sourced)
Enterprise (up to 25 users, all layers, register Pro, 50M AI tokens, SSO, 20% off reports)	15,000/yr	2,500,000/yr	Felt Enterprise from USD 1,250/mo (Felt); S&P Capital IQ Pro contracts USD 13.5k–215k, median about USD 53k (CostBench)
Enterprise Plus (unlimited users, data feed, dedicated analyst hours)	40,000/yr	6,000,000/yr	GlobalData mining median USD 68,500/yr (ZoomInfo)
API licence (tenure, occurrences and law endpoints, 100k calls a year)	10,000/yr	1,500,000/yr	Landgate metered tenure data (Landgate)
API overage	25 per 1,000 calls	2,500 per 1,000 calls	Mapbox costs PakGeoLith USD 3–5 per 1,000 map loads (Woosmap)
Onboarding and integration (one-off)	2,500	300,000	S&P one-off implementation USD 15–50k (earlier research, CostBench)

3.7 Government data licences and white-label portals

There is no old price recorded and no Pakistani contract benchmark was found. Every figure in this section is a proposal.

Product	New USD	New PKR	Benchmark or constraint (sourced)
Pilot (3 months, one district or dataset)	0	0	SUPARCO–E-Agri no-cost MoU model (ProPakistani)
Provincial or agency data licence (25 users, all provinces, training)	15,000/yr (donor-funded)	2,900,000/yr	Federal procurement above Rs3M must be advertised (PPRA)
White-label investor portal (cadastre front-end, data room, Urdu/English)	50,000 setup + 25,000/yr	10–15M setup + 5–10M/yr	National Minerals Data Centre budget Rs295M (Pakistan Today); GSP ENVI lot Rs200,000 (PPRA EPMS)
PMIF or SIFC event investor data room	10,000 per event	1,500,000 per event	Proposal
Legacy-report digitisation	Revenue share 30–50% or cost-plus	Same	Zambia sells survey data to investors "for a nominal fee" (Zambia Monitor)
Training day (up to 20 officials)	1,500/day	150,000/day	Proposal

Government contracts should be billed by milestone with a mobilisation advance and a 10% CPI escalator. Portals worth more than Rs3M should be expected to go through EPADS tenders.

3.8 Marketplace: memberships, listings, commissions, auctions, escrow and pass-throughs

The old price was a flat PKR 5,000 per auction lot. No other marketplace fees were recorded. Percentage fees are the same in both currencies; minimum fees are shown in each.

Item	New USD	New PKR	Benchmark (sourced)
Buyer account	Free	Free	Catawiki and eBay charge buyers nothing to join
Verified-buyer KYC (one-off)	25	2,500	Sumsub USD 1.35–1.85 per check (CostBench); NADRA about PKR 10–99 per check (Express Tribune)
Seller onboarding verification (licence and lease check; site visit at cost)	100	10,000	The data cost is trivial; the fee covers manual checking (inference)
Verified Seller (10 live listings)	600/yr	50,000/yr	IndiaMART catalogue INR 35,000/yr (about USD 400) (IndiaMART); TrustSEAL combo INR 50,000 (about USD 570) (IndiaMART)
Pro Seller (unlimited listings, analytics, 2 featured weeks a quarter, 1 compliance report)	2,000/yr	150,000/yr	IndiaMART average paying supplier about USD 730/yr (Inc42)
Exporter Seller (multi-site, verified site visit, export-document support)	5,000/yr	600,000/yr	Alibaba Gold Supplier USD 4,700/yr (Alibaba); Verified Supplier about USD 12,500 (Jing Sourcing)
Listing (members)	Free	Free	Gem platforms charge a percentage, not a per-lot fee
Listing (non-member, 30 days, licence-verified only)	15	2,000	eBay-style insertion fee logic (inference)
Featured listing	40/week	5,000/week	IndiaMART "Star" category visibility INR 75,000/yr (about USD 850; single invoice) (Scribd)
Category sponsor (e.g. "Chromite")	1,000/yr	200,000/yr	Same
Verified RFQ lead beyond plan	3 per lead	300 per lead	IndiaMART about INR 18 per lead (Refrens)

Item	New USD	New PKR	Benchmark (sourced)
Commission, bulk minerals (chromite, coal, marble, gypsum)	1.0% up to USD 50k, 0.5% above; minimum 50	Same %; minimum 10,000	MSTC charges 0.2% on ores and minerals (Odisha Finance); Tanzania 1% export inspection fee (TanzaniaInvest)
Commission, gemstones (fixed price)	8% up to USD 5k, 5% above; minimum 10	Same %; minimum 2,000	eBay jewellery 15% up to USD 5k, 9% above (Taxomate)
Auction seller commission, cut gems and specimens	10% up to USD 10k hammer, 6% above; minimum 25	Same %; minimum 5,000 (the old flat fee becomes the floor)	Catawiki seller about 12.5% (Catawiki)
Auction seller commission, rough parcels	3%	3%	Tender houses (Bonas) negotiate unpublished, probably low single-digit rates (inference) (Rapaport)
Auction seller commission, bulk-mineral e-auctions	0.5%	0.5%	MSTC 0.2% (Goa DMG)
Buyer's premium (gem and specimen auctions)	5%	5%	Catawiki 9% + €3; Sotheby's 28% (luxury, too high for B2B) (Antiques Trade Gazette)
Buyer's premium (bulk e-auctions)	0%	0%	Keeps industrial buyers on the platform (proposal)
Escrow (split 50/50 by default)	2.0% up to USD 5k (min 30); 1.5% to 50k; 1.0% to 500k; 0.6% above	Same %; minimum 5,000	Escrow.com 2.6% (min USD 50) up to 5k, 2.4% to 50k, 1.9% to 200k, 1.0% at 1–3M (Escrow.com)
Card payment surcharge	Pass-through about 3.2%	Pass-through about 2.9% + PKR 30	Safepay (Safepay); Raast is free to payers (SBP)
LC-settled deals (instead of escrow)	0.25% document-check fee	Same	HBL import LC 0.30–0.40% for the first quarter, minimum Rs2,500 + Rs2,000 SWIFT (HBL)
Assay coordination	Lab fee +15%; minimum 25 per sample	Lab fee +15%; minimum 3,000	Fusion-XRF major elements about USD 12–18 per sample (Stellenbosch CAF); ALS ME-XRF26s chromite method (ALS)
Sealed-sample chain of custody	40 per lot	5,000 per lot	Proposal
Gem lab, local identification (PGJDC)	Lab fee + 6	Lab fee + 1,500	PGJDC fees are not published (PGJDC)
Gem lab, international (e.g. Gübelin)	Lab fee +10%; minimum 30	Same at PKR 280	Gübelin USD 280 without origin or USD 560 with origin for stones under 1 ct, up to USD 1,320/2,640 for 50 ct and over (Gübelin)
"Provenance-verified" badge (licence + lab + chain of custody)	40 per lot	5,000 per lot	Gübelin's origin report costs double the plain report, which shows the premium buyers place on provenance
Pre-shipment inspection	Inspector quote +10%	Same	No sourced fee was found

3.9 Academic, partner and other programmes

Item	New USD	New PKR	Benchmark
Student Explorer (with valid student ID)	60/yr	3,000/yr	Spotify Student PKR 199/mo (Spotify PK)
University site licence (unlimited students, 5 staff Professional seats)	1,500/yr	150,000/yr	Proposal
Association member discount	20–33% off reports	Same	Proposal
Reseller margin	25% off list (reports); 20% of first-year subscription	Same	Farmonaut runs an affiliate programme (no rate published)

Item	New USD	New PKR	Benchmark
Referral fee	10% for 12 months	Same	Proposal

4. What five typical customers would pay

↑ Back to contents

These examples use the proposed prices above. They show how the new structure changes revenue per customer.

Customer	What they buy	Total under new prices	Under old prices
Small KP marble owner (via association)	Explorer, 1 standard compliance report at member rate, Verified Seller	PKR 86,000 in year one, plus commission on sales	PKR 35,000 (subscription + report)
Domestic corporate (Mari-type)	Enterprise PKR 2.5M; 2 × T4 at 20% off (PKR 1.6M); 10 transaction-grade memos at 20% off (PKR 1.2M)	**PKR 5.3M (about USD 18,900)**	About PKR 2.2M (2 × T4 + 10 × PKR 30k + 1 subscription)
Foreign junior	Pro Plus USD 1,500; T3 USD 7,500 (10% off = 6,750); 3 memos USD 3,600; WorldView-3 SWIR add-on about USD 1,530	**About USD 13,380**	About USD 2,700 (assuming an old T3 of about PKR 650k; not recorded)
Chromite seller, USD 50,000 lot with escrow	Commission 1% = USD 500; escrow 1.5% = USD 750 (split); 2 assays plus chain of custody about USD 90	**About USD 1,340 of platform revenue**	PKR 5,000 (about USD 18)
Emerald auction lot, USD 10,000 hammer	Seller 10% = USD 1,000; buyer's premium 5% = USD 500; escrow 1.5% on USD 10,500 = USD 158; international origin report from USD 616 (pass-through)	**About USD 1,660 platform revenue** (about 15% total take, against Catawiki's about 21.5%)	PKR 5,000 (about USD 18)

The same calculation from the earlier research still applies. **1,000 subscribers at the old PKR 5,000 bring in only PKR 5M (about USD 18,000) a year.** Under the new list, a single domestic corporate account is worth about that much.

5. Go-to-market, condensed

↑ Back to contents

Competitors are real; the Pakistan bundle is not taken

Competitor	What they do	Threat	Our answer
Fleet Space (Australia)	ExoSphere seismic surveys; worked at Barrick's Reko Diq in 2024 (Mining.com)	High with majors	Partner or sit alongside: we provide tenure and law, they provide ground physics
Farmonaut (India)	Tiered satellite mineral reports, quoted per project, with an affiliate programme (Farmonaut)	High on price	Published prices, local tenure and law, Urdu support
VRIFY DORA, KoBold, Earth AI	AI prospectivity; KoBold raised USD 537M (Mining Weekly)	Medium	They do not sell a Pakistan atlas
SUPARCO, GSP, NMDC, provincial cadastres	State data and services: SUPARCO offers "Geology & Mineral Prospection" (SUPARCO); KP cadastre portal (KP)	High in the long run	Become their analytics and distribution partner
Freelancers (Upwork, Fiverr)	Cheap ASTER and Sentinel mapping (Upwork)	Medium at the low end	Recruit them as field and reseller partners
IndiaMART / Alibaba, PGJDC portal	General B2B directories; state gem portal (PGJDC)	Medium	Licence-verified sellers, assay and escrow

Government routes: pilot, then proposal, then contract, province by province

Step	Route	Example	Price point
1	No-cost MoU or pilot	SUPARCO HS-1 analytics MoU (E-Agri model); digitise one GSP district	Free
2	Unsolicited proposal under PPRA (Rule 37-A); expect an open tender	Investor layer on the KP cadastre (ProPakistani)	Proposal-stage
3	Annual data licence	Provincial mines department, GSP, PMDC	PKR 2.9M a year
4	White-label portal or data room	SIFC or PMIF investor room, provincial portal	PKR 10–15M setup + PKR 5–10M a year
5	JV or carried interest	Targeting JV with PMDC or OGDCL, modelled on Ma'aden–Ivanhoe (Kitco)	Negotiated equity

Contracts are signed province by province, because provinces own minerals and resist federal control. Gilgit-Baltistan's Chief Minister said so publicly on 25 October 2026 (Express Tribune).

Channels and events

When	Channel or event	Who we meet	Offer
12–13 Nov 2026	**PMIF26**, Jinnah Convention Centre, Islamabad; about 5,000 delegates attended in 2025 (Profit)	(d), (e), (g), (h), (i)	Free "tenure snapshot"; USD price sheet; pilot offers
12–14 Jan 2027	Future Minerals Forum, Riyadh	Gulf investors, Manara	"Verify before you invest" pack
31 Jan–4 Feb 2027	Tucson AGTA GemFair	Gem buyers (a)	Verified Pakistani gem lots
8–11 Feb / 7–10 Mar 2027	Mining Indaba / PDAC	Juniors, diaspora	Customer-led side event
Ongoing	Associations (FMOA, APMIA, APCEA), PGJDC exhibitions	(c), (b)	Member rate PKR 30k compliance report

When	Channel or event	Who we meet	Offer
Ongoing	YouTube and Facebook in Urdu and Pashto, with WhatsApp; LinkedIn	(c) mass market; (e), (f), (g) professionals	"How to check a mining lease" explainers

90-day plan (3 November 2026 to early February 2027)

When	Actions	Success looks like
Days 1–9	Publish the two-currency price list. Fix the website (auction status, tier names, Balochistan coverage note, remove "investment advice" wording). Drop "only one in the world". Prepare a clean sample report with a one-page summary, plus English and Urdu one-pagers. Book PMIF26 meetings.	Meetings booked with OGDCL, PPL, Mari, PMDC, SUPARCO, GSP, provinces and law firms
12–13 Nov	Work PMIF26 with the free tenure snapshot and pilot offers	30+ qualified leads; 3+ pilot or MoU talks
Weeks 2–6	Follow up within 48 hours. Run 2–3 discounted pilots in exchange for case-study rights. Launch Professional, Pro Plus, Team and the USD lists.	First Enterprise or T3+ sale
Weeks 6–10	Sign association MoUs. Start the Urdu video and WhatsApp funnel. Recruit an advisory board and a Competent Person partner.	1–2 association MoUs
Weeks 10–13	Draft a no-cost government MoU. Prepare the Riyadh investor pack. Choose an escrow partner (bank trustee account or Safepay).	MoU draft; escrow partner shortlisted

6. Risks and what to verify before joining

↑ Back to contents

Risk	Why it matters	Mitigation
Over-claiming ("only one in the world")	Easily disproved by Fleet Space at Reko Diq and by SUPARCO's HS-1	Use the integrated-platform claim
The state offers similar data free	The NMDC, cadastres and HS-1 could make the atlas less valuable	Partner with them; build the Balochistan dataset
Prices too high for locals	Small owners are already protesting rent rises	Member rates, Free and Explorer tiers, transaction-event selling
Marketplace legal exposure	Pakistan has **no escrow law** (IBA); liability for bad title	Bank trustee or licensed PSP; licence-verified sellers only
Tax treatment unconfirmed	IT-export status, sales tax by province, 12% Section 233 withholding	Get a tax adviser's ruling before invoicing
Security and politics	Balochistan had more than half of Pakistan's attacks in 2025 (CSIS)	Remote-first products; field work through partners
Report quality	The sample T4 was dated the same day its inputs arrived and had formatting faults	QA process, honest turnaround, plain-language summary

Verify before joining	Why
Paying customers and revenue since the September 2026 launch	Shows whether anyone pays at all
Data sources and analysts' qualifications	Shows whether the reports can pass a Competent Person's review
Legal right to republish cadastre and GSP data; Balochistan plan	The core asset depends on it
Report QA and real turnaround times	Trust is the product
Auction status and who holds buyer funds	Regulatory and fraud exposure
Founder's acceptance of percentage fees and USD pricing	Shows whether this price list can actually be adopted
Runway, cap table, your equity, vesting and role	Your personal downside
Existing government MoUs, by name	Separates relationships from aspirations
HS-1 data terms; status of the NMDC and PGJDC portals	Whether the state ends up as a supplier or a competitor

7. Conclusion

↑ Back to contents

The repricing is about more than charging more. It turns PakGeoLith from a cheap map subscription into a **trust service whose price follows the size of the decision it supports**. A PKR 2,500 point test helps someone decide whether a site is worth a visit. A USD 12,000 survey helps a company decide where to send a drilling budget worth hundreds of thousands. A 1% commission with escrow decides whether a USD 50,000 chromite deal happens at all. Running two currency lists lets the same product serve a Swat gem trader and a Toronto junior without undercutting either. Moving marketplace fees from a flat charge to percentages means PakGeoLith earns only when it carries risk, which also makes it harder for buyers and sellers to cut the platform out.

The weakest parts of this list are the parts with no benchmark: government portals, the Balochistan layer, and the T3–T5 USD prices, because global vendors hide their report prices. These should be tested at PMIF26 and in the first pilots rather than defended as fixed. Publishing USD prices at all is unusual in a quote-only industry, and could become a marketing advantage in its own right, provided the sample report is good enough to justify the price.

8. One-page price list summary

↑ Back to contents

All prices are **proposals**. USD 1 = PKR 280. PKR prices exclude sales tax. Percentages apply in both currencies.

Product	USD (international)	PKR (local)	Unit
Free tier	0	0	—
Explorer	12 / 120	600 / 6,000	month / year
Professional	49 / 490	3,500 / 35,000	month / year
Pro Plus / Investor	150 / 1,500	12,000 / 120,000	month / year
Team (5 + 25 viewers)	249 / 2,490	20,000 / 200,000	month / year
AI top-up	5	1,000	per 1M tokens
Premium layer pack	100	10,000	per year
Point-geology test	25	2,500	per point
5 km brief, automated / reviewed	120 / 450	15,000 / 60,000	per brief
Survey T1 / T2 / T3	1,500 / 4,000 / 7,500	150k / 400k / 650k	per survey
Survey T4 / T5	12,000 / from 25,000	1.0M / from 2.5M	per survey
Library report access	295	25,000	per report
Commercial imagery	Cost +20%	Cost +20%	per order
Field verification day	500	25,000	per day + costs
Licence check / standard / transaction memo	30 / 450 / 1,200	3,000 / 45,000 (30k member) / 150,000	per licence
Express (reports)	+50%	+50%	—
Portfolio monitoring	120	12,000	per licence per year
Law Register Pro / Institutional	2,400 / 7,500	120,000 / 400,000	per year
Enterprise / Enterprise Plus	15,000 / 40,000	2.5M / 6.0M	per year
API licence (100k calls)	10,000	1.5M	per year
Government data licence	15,000	2.9M	per year
White-label portal	50k + 25k/yr	10–15M + 5–10M/yr	setup + annual
Verified / Pro / Exporter Seller	600 / 2,000 / 5,000	50k / 150k / 600k	per year
Featured listing / category sponsor	40 / 1,000	5,000 / 200,000	week / year
Bulk-mineral commission	1.0% to USD 50k, 0.5% above	Same (min PKR 10,000)	per sale
Gem commission (fixed price)	8% to USD 5k, 5% above	Same	per sale
Auction seller: gems / rough / bulk	10% (6% above USD 10k) / 3% / 0.5%	Same (gem min PKR 5,000)	per lot
Buyer's premium: gems / bulk	5% / 0%	5% / 0%	per lot
Escrow	2.0% → 1.5% → 1.0% → 0.6%	Same (min PKR 5,000)	per deal
Assay / gem lab / KYC	Lab +15% / lab +10% / 25	Lab +15% / lab +PKR 1,500 / 2,500	per item
