PAKGEOLITH · LAUNCH PLAN

Launching Subscriptions & Satellite Surveys

A practical 90-day plan and strategy: who we sell to, what we charge, who does what, and what happens each week

Prepared 4 November 2026 · Phase 1 of the PakGeoLith roll-out

Scope: Subscription packages and Remote-Sensing Survey reports only. Marketplace, auctions and compliance reports come later.

Prices are launch proposals in PKR (local) and USD (international) at USD 1 = PKR 280. Confirm with the team before publishing.

1. Launch at a glance (one page)
2. Our strategy in plain words
3. Who does what: the team split
4. Product 1: Subscription packages
5. Product 2: Satellite survey reports
6. Who we sell to first: target customers
7. Launch offers
8. How we sell surveys: the 10-step process
9. How we sell subscriptions: the online engine
10. Before we sell: the readiness checklist
11. PMIF26 (12–13 Nov): the launch event plan
12. The 90-day timeline, week by week
13. Targets, tracking and weekly rhythm
14. Budget (rough planning figures)
15. Risks and how we handle them
16. After 90 days: when we add the next products
17. Toolkit: pitches, scripts, objections, templates
18. Customer price sheet (hand-out)

1. Launch at a glance

↑ Back to contents

The goal for the next 90 days (4 Nov 2026 – 2 Feb 2027)

Launch two products properly, **Subscriptions** and **Satellite Surveys**. Get our first paying customers, deliver excellent work, and collect proof (case studies and testimonials) that lets us grow. Nothing else gets launched until these two are working.

Question	Answer
What are we selling?	(1) **Subscriptions**: yearly or monthly access to the PakGeoLith map, mineral and licence data, law register and AI assistant. (2) **Surveys**: satellite remote-sensing reports on a client's land that tell them what the rocks suggest *before* they spend money on fieldwork.
Who are we selling to first?	Surveys: mining companies, licence holders, investors and consultants. Subscriptions: geologists, consultants, serious mine owners, investors, law firms and students.
Our one-line message	**“Screen your ground from space before you spend on the field.”**
How we describe ourselves	“Pakistan's integrated mineral-intelligence platform: geology, mining licences, mining law and satellite analysis in one place.” We never say “the only one in the world”.
Launch moment	**PMIF26, Pakistan Minerals Investment Forum, 12–13 November 2026, Jinnah Convention Centre, Islamabad.** It is 8 days away. About 5,000 delegates came last year.
Prices	Subscriptions from **PKR 6,000/year** (Explorer) to **PKR 200,000/year** (Team). Surveys from **PKR 150,000** (Quick Screen) to **PKR 1,000,000** (Full Package). Foreign clients pay in USD. See section 18.
Who does what	**Business Lead (owner):** meetings, deals, government, events, closing surveys, collecting payment. **Growth Lead (you):** website, pricing, online marketing, subscriptions, sales materials, CRM, report quality. **Tech & analyst team:** platform and survey production.
90-day targets (base case)	800 free sign-ups · 60 paid subscriptions · 6 surveys sold · 3 case studies · about **PKR 2.8–3.8 million** booked revenue.
Key rule	Under-promise, over-deliver. Every report is checked, dated correctly, written in plain language and walked through with the client in a meeting.

2. Our strategy in plain words

↑ Back to contents

Why start with only these two products?

- **They are ready.** The platform and the survey method already exist. The marketplace and auctions still need escrow, legal set-up and partners.
- **They work together.** Subscriptions bring in many people cheaply and build our name. Surveys bring in the real money. A subscriber who likes the map becomes a survey customer, and a survey customer gets a subscription to keep using the data.
- **They build proof.** Every survey delivered well becomes a case study. Later, those case studies sell compliance reports, government projects and the marketplace.

The four ideas behind everything we do

Idea	What it means in practice
1. Sell trust, not satellites	Satellite pictures are free for anyone (NASA, Europe). Other companies already do satellite exploration, for example Fleet Space at Reko Diq and Farmonaut in India, and SUPARCO launched Pakistan's own hyperspectral satellite in 2025. Our edge is that we combine satellite analysis **with Pakistan's licence records, mining law and local knowledge**, and explain it in plain language, in English and Urdu.
2. Two price lists	Pakistani customers pay in **PKR** at local prices. Foreign companies and investors pay in **USD** at international prices, which are still below global competitors.
3. Relationships close deals, online builds volume	Surveys are sold face to face: meetings, events, introductions. That is the Business Lead's strength. Subscriptions are sold online: website, social media, WhatsApp, universities. That is the Growth Lead's strength.
4. Honesty is our brand	Satellites cannot see gold, platinum or copper directly. They map the *rocks* those metals live in. We say this upfront. A result of “no strong target” is still valuable, because it saves the client from wasting money on fieldwork. Clients who trust us come back.

How the two products feed each other

Step	What happens	Product
1. Discover	Person sees our post, video, talk or booth.	Marketing
2. Try	Opens a **free account** and explores the map.	Subscription (Free)
3. Pay a little	Upgrades to **Explorer or Professional** for more layers and AI.	Subscription (Paid)
4. Ask a big question	“Is my licence area worth exploring?” leads to a **Quick Screen or Standard Survey**.	Survey
5. Stay	The survey comes with 1 year of **Professional free**, so the client keeps using the platform and renews.	Both

3. Who does what: the team split

↑ Back to contents

We are a small team, so every job has **one clear owner**. The owner doesn't have to do all of it alone, but they are responsible for it getting done.

Business Lead (the owner)

Strength: deals, people, the physical side.

Owns:

- Meetings with companies, mine owners and investors
- Closing survey deals and negotiating
- Government and association relationships
- PMIF26 and other events: being the face of PakGeoLith
- Collecting payments and managing client relationships
- Field partners (geologists, security, logistics) for later
- Final decisions on pricing exceptions and discounts

Growth Lead (you)

Strength: tech, online, organising.

Owns:

- Website and pricing page, and fixing wrong information
- Subscription sales: online marketing, social media, WhatsApp, universities
- Sales materials: one-pager, deck, sample report, price sheet
- CRM tracker (who we talked to, what's next)
- Demos of the platform
- Survey order intake and coordination with the analyst team
- Quality check of every report before it goes out

Tech & analyst team (support we receive)

Runs the platform, sets up subscription payments and accounts, produces the survey reports, and fixes bugs. Before launch, we need from them a clear answer on **how many surveys they can deliver per month** (see section 10).

Responsibility table

Task	Business Lead	Growth Lead	Tech team
Survey sales meetings and closing	OWNER	Supports (demo, proposal)	—
Survey proposal and quote document	Approves	OWNER	Confirms scope and time
Survey production	—	Coordinates	OWNER
Report quality check	Reads summary	OWNER	Fixes
Report delivery meeting	OWNER	Joins	Analyst joins
Subscription marketing and sign-ups	Shares in his network	OWNER	Payments and accounts
Website content and prices	Approves	OWNER	Implements
Events and government	OWNER	Materials and logistics	—
Invoices and payment collection	OWNER	Invoice template, tracking	—
Weekly review meeting	Chairs	Prepares numbers	Optional

4. Product 1: Subscription packages

↑ Back to contents

What a subscription is: paid access to the PakGeoLith platform. It includes the interactive map of Pakistan's geology, mineral sites and mining licences, the mining-law register, quick location reports and “Broski”, the AI assistant that answers questions about Pakistan's minerals and mining rules.

Launch line-up: five packages, plus Enterprise on request

Package	Made for	What they get	PKR (local)	USD (intl.)
Free	Anyone curious, students	Basic geology and mineral map; 1 location check a month; small AI allowance (about 12 questions a month)	Free	Free
Explorer	Students, small mine owners, beginners	All public map layers, licence view, law-register titles; 5 location checks a month; AI about 125 questions a month	600/month **6,000/year**	12/month 120/year
Professional MAIN SELLER	Geologists, consultants, serious mine owners	Everything in Explorer, plus premium layers (satellite alteration, licence history, restricted areas), full law text, 2 automated 5 km reports a year, data exports; AI about 500 questions a month	3,500/month **35,000/year**	49/month 490/year
Investor	Investors, overseas Pakistanis, advisers (1 power user)	Everything in Professional, plus Law Register Pro, 6 location reports a year, **10% off all surveys**; AI about 1,250 questions a month	12,000/month **120,000/year**	150/month 1,500/year
Team	Companies, law firms, consultancies	5 full users + 25 view-only users, 12 location reports a year, **15% off surveys**, shared AI allowance, priority support	20,000/month **200,000/year**	249/month 2,490/year
Enterprise	Large companies, banks, government	25+ users, data access (API), custom layers, 20% off surveys, dedicated contact	Quote, from about PKR 2.5M / USD 15,000 a year	

Annual plans get about 2 months free compared with paying monthly. PKR prices exclude provincial sales tax on services, which needs checking with a tax adviser. Old website prices (PKR 5,000 and 10,000 a year) are replaced. Anyone who already paid the old price keeps it until renewal.

Why these prices are fair

- **Explorer at PKR 6,000 a year** costs about the same as a year of Spotify or a few months of ChatGPT in Pakistan. Easy to say yes to.
- **Professional at PKR 35,000 a year** is less than one day of a consultant geologist's fee. International equivalents (EOS LandViewer, Opaxe) cost about USD 50 a month.
- **Investor and Team** are still far below global mining-data services, which charge USD 4,400 to 30,000 per user per year.

What the AI allowance means

Each package includes a monthly amount of AI use, measured technically in “tokens”. We show customers **approximate questions per month**, which is easier to understand. Extra AI can be bought: **PKR 1,000 / USD 5 for about 250 more questions**.

5. Product 2: Satellite survey reports

↑ Back to contents

What a survey is: the client gives us the boundary of their land (a licence area or a block they're interested in). Our analysts study it using several satellites. The report tells the client which parts of the land show the **rock types and alteration** linked to the minerals they're looking for, whether those spots stand out statistically, what the licence and legal situation is, and **what to do next on the ground**.

> **What a survey is NOT (always say this upfront)**
>
> It does not "see" gold, copper or platinum directly. It does not measure how much ore there is (it is not a JORC or NI 43-101 resource report). It does not replace field sampling and drilling. It tells the client **where it is worth looking, and where it isn't**, before they spend money on fieldwork that costs 10 to 50 times more.

Launch line-up: three main packages, two on request

Fewer choices make selling easier. Lead with the three main packages and offer T3 and T5 only when a client needs them.

Package	Best for	What's included	Delivery	PKR	USD
T1 Quick Screen ENTRY	A licence holder or buyer who wants a first opinion on one block	1 block up to 10 km², free satellite data, rock and alteration map, plain-language verdict, next steps	5 working days	**150,000**	1,500
T2 Standard Survey MAIN SELLER	Companies and serious owners deciding where to explore	Up to 25 km², multi-sensor alteration mapping, target zones with statistical testing, licence check, field plan	10 working days	**400,000**	4,000
T4 Full Package	Companies and investors with several blocks or a portfolio	Up to 100 km² or 3 blocks, all sensors including NASA hyperspectral and radar, ranked targets, licence and law overlay, drill and field plan	20–30 working days	**1,000,000**	12,000
T3 Targeting ON REQUEST	Between T2 and T4	Up to 50 km², multi-sensor ranked targets	15 working days	650,000	7,500
T5 District ON REQUEST	Large areas, investors, government	Over 100 km², custom scope, optional commercial imagery and field partner	30–45 working days	from 2.5M	from 25,000

Extras clients can add

Extra	Price
Express delivery (half the time)	+50%
GIS data pack (map files for their own software)	+15%
Commercial high-resolution satellite images	Cost of the images +20%. For example, WorldView-3 from about USD 1,530
Existing regional report from our library	PKR 25,000 / USD 295
Included free with every survey	**1 year of Professional subscription + a results meeting with the analyst**

Why these prices are fair (what to tell clients)

- A ground magnetic or drone survey of 30 km² costs about **USD 23,000–98,000**. Our Full Package is **USD 12,000** and tells them *where* to put that fieldwork, or whether to skip it.
- International junior geologists charge USD 500–600 a day. A T2 is about 10 analyst days for USD 4,000.

- Payment terms: **T1 100% in advance. T2 and above: 50% to start, 50% on delivery**, which builds trust with new clients. Foreign clients: 100% in advance, in USD.

Report quality standard: lessons from the sample T4

Our sample T4 report was careful and honest, but it is not yet a polished client product. **Every report must pass this checklist before delivery:**

#	Check	Why
1	Starts with a **one-page plain-language summary**: “What we found, what it means for you, what to do next”, in English, with an Urdu version on request	Most clients aren't geologists
2	Report date = **delivery date**, and turnaround matches what we promised	The sample was dated the same day the data arrived, which looks templated
3	All tables fit the page; no overlapping text; section numbers continuous	The sample had broken tables
4	Short glossary; internal codes (R9, G6, L12) removed or explained	Jargon loses clients
5	Clear verdict per block, and an honest explanation if there is “no target”	Protects trust
6	Next steps with **indicative costs** (for example, “ground magnetics: about PKR X”)	Leads to the next sale
7	Client name, licence number and coordinates double-checked	Basic professionalism
8	Disclaimers: not a resource estimate, not investment advice	Legal protection

6. Who we sell to first: target customers

↑ Back to contents

Survey buyers (Business Lead's list)

Group	Examples	Why they buy	Best package
A. Pakistani companies entering mining PRIORITY	Mari Minerals, PPL, OGDCL, PMDC, NRL, Globacore (Fatima group), FWO-linked firms	They have money and licences in Chagai and elsewhere, but are new to hard-rock minerals	T2, T4, Team subscription
B. Cement and industrial groups	Cement companies with limestone and gypsum leases; ceramics and glass firms with clay and silica sites	Want to know the quality and extent of their raw-material areas	T1, T2
C. Licence holders and mine owners	Members of the Frontier Mines Owners Association (KP), All Pakistan Marble Industries Association, GB and Balochistan owners	Selling or partnering a licence, attracting an investor, deciding where to dig next	T1
D. Foreign companies and juniors PRIORITY	Companies at PMIF26, US, Gulf, Chinese and Australian juniors looking at Pakistan	Big information gap about Pakistan; used to paying for data	T2–T4 in USD
E. Investors and overseas Pakistanis	People offered a “mine deal” who want an independent check	Avoid fraud and bad deals	T1 + Investor subscription
F. Consultants and law firms	Geological consultancies, firms doing deal checks	Need geology evidence for their clients; can resell our reports	T1–T2 (reseller discount)

Goal: 50 named survey conversations in 90 days, at least 20 of them in-person meetings.

Subscription buyers (Growth Lead's list)

Group	How to reach them	Best package
Geology students and lecturers	University geology departments: Punjab University, NCE Geology Peshawar, Karachi, Balochistan, QAU, Bahria, NUST, UET. Student ambassadors and campus talks.	Free → Explorer (student rate)
Independent geologists and consultants	LinkedIn, professional groups, PAPG events, word of mouth	Professional
Serious mine owners	Associations, Facebook and WhatsApp groups, Urdu/Pashto YouTube, Business Lead's network	Explorer → Professional
Investors and overseas Pakistanis	LinkedIn, diaspora groups (UK, Gulf, Canada, US), PMIF26	Investor (USD or PKR)
Companies, law firms, banks	Direct sales by the Business Lead, after a demo	Team / Enterprise

7. Launch offers

↑ Back to contents

Launch offers give people a reason to **act now** and help us collect our first proof. They are time-limited, so they don't permanently lower our prices.

Offer	What the customer gets	What we get	Valid
Free Ground Snapshot (main PMIF hook)	A free automated 5 km location report (normally PKR 15,000) for any coordinate or licence they give us, delivered within 48 hours	Their contact details, and an excuse to follow up with a survey proposal	PMIF26 and the 2 weeks after
Founding Member (subscriptions)	**30% off the first year** on any annual plan; price locked for renewal	Fast first subscribers and early feedback	First 100 paid subscribers, or until 31 Jan 2027
Founding Survey Partner	**25% off** their first T1, T2 or T4 survey	Permission to use an anonymised case study and a testimonial	First 5 survey clients only
Professional free trial	14 days of Professional, no payment needed	A chance to show value before asking for money	Always (online)
Survey + Subscription bundle	Every survey includes 1 year of Professional free	The client stays on the platform and renews	Permanent
Student rate	Explorer at 50% off with a student ID	Future geologists know our brand	Permanent
Association member rate	20% off subscriptions and T1 for members of partner associations	Access to thousands of mine owners through one deal	When an MoU is signed
Referral reward	Anyone who refers a paying survey client gets 10% of the survey value (or account credit)	Turns our network into salespeople	Permanent

Discount rules (to protect our prices)

- Offers don't stack. The best single offer applies.
- Any other discount above 25% needs the Business Lead's approval.
- We discount in exchange for something (a case study, speed, volume), never just because someone asked.
- Foreign (USD) clients don't get the PKR price.

8. How we sell surveys: the 10-step process

↑ Back to contents

Follow the same steps every time, so nothing is forgotten and every client has the same good experience.

#	Step	What happens	Owner	Time
1	**Enquiry**	Lead comes in from a meeting, WhatsApp, email, the website or a referral. Add it to the tracker immediately.	Whoever receives it	Reply the same day
2	**Discovery call**	15–20 minute call or meeting using the question list in section 17: Where is the land? What mineral? Why do they need it (buy, sell, invest, explore)? Deadline? Budget?	Business Lead	Within 2 days
3	**Free Snapshot**	Send an automated 5 km report on their location to show what we can do.	Growth Lead + tech	48 hours
4	**Proposal**	One-page proposal: recommended package, what they get, delivery time, price, payment terms. Use the template.	Growth Lead drafts, Business Lead sends	Within 2 working days
5	**Agreement + advance**	Simple service agreement and NDA signed; invoice sent; advance received (100% for T1, 50% for T2+).	Business Lead	—
6	**Data intake**	Client sends boundary (Google Earth KMZ file or coordinates), licence number and target minerals. Check it's complete. The clock starts now.	Growth Lead	Day 0
7	**Analysis**	Analysts produce the report. Growth Lead checks progress halfway and tells the client “on track”.	Tech team	Per package
8	**Quality check**	Run the 8-point checklist (section 5). Business Lead reads the one-page summary: if he understands it, the client will.	Growth Lead	1–2 days
9	**Results meeting**	Deliver the report in a 30–45 minute meeting or video call with the analyst. Walk through the map and the verdict in plain language. Collect the final payment.	Business Lead + analyst	On delivery
10	**Follow-up**	After 1 week: ask for feedback and a testimonial. Offer the next step (bigger package, other blocks, field partner). Activate their free Professional year.	Business Lead	Week +1, then monthly

Golden rules for selling surveys

- **Set expectations at step 2:** “We will tell you honestly what the satellites show, including if nothing stands out.”
- **Recommend the smallest package that answers their question.** A happy T1 client becomes a T4 client.
- **Never promise minerals, grades or values.**
- **Always end a meeting with a clear next step and a date.**
- **Only take on as many surveys as the analysts can deliver on time.** A late report damages us more than a lost sale.

9. How we sell subscriptions: the online engine

↑ Back to contents

The funnel: from stranger to paying subscriber

Stage	What we do	90-day target
1. Attract	Posts, videos, talks, PMIF26, campus visits, WhatsApp shares	20,000 people reached
2. Free sign-up	Simple sign-up with name, phone and email. Free account explores the map immediately.	800 free accounts
3. Welcome series	Automatic messages on day 0, 2, 5 and 10 (email + WhatsApp): how to use the map, a 2-minute video, a success story, the trial offer	40% open the map twice
4. Trial	14-day Professional trial	200 trials
5. Paid	Founding Member offer: 30% off the first year	60 paid subscriptions
6. Upsell	Subscribers asking big questions get offered a survey	2 surveys from subscribers

Channels

Channel	What to post or do	How often
LinkedIn	Professional posts: map screenshots of mineral belts, “what satellites can and can't tell you”, PMIF news, client stories. Target geologists, investors, mining companies, diaspora.	3 posts a week
YouTube (Urdu, later Pashto)	Short explainer videos: “How to check a mining licence”, “Chromite belts of Balochistan”, “What is a satellite survey?”, “Gilgit-Baltistan's mineral map tour”	1 video a week
Facebook + WhatsApp	Join and contribute to mine-owner and gem-trader groups; Facebook ads that open a WhatsApp chat; WhatsApp Business catalogue with packages	Daily replies; ads PKR 30–50k/month
Universities	One student ambassador per geology department (free Professional + referral reward); one campus talk or demo per university	8 universities in 90 days
Monthly live demo	45-minute online session: platform tour + Q&A, recorded for YouTube	Monthly
Business Lead's network	He forwards our WhatsApp message and one-pager to his contacts; every meeting ends with “open a free account”	Ongoing

Content rules

- Always **show the map**: screenshots and screen recordings sell better than words.
- Bilingual: English for LinkedIn and investors, Urdu or Roman Urdu for owners and WhatsApp.
- Educate first, sell second: about 4 helpful posts for every 1 sales post.
- Never post a client's confidential data. Use anonymised or public areas.

10. Before we sell: the readiness checklist

↑ Back to contents

Most of this must be done **before PMIF26 (by 11 November)**. Items marked “Week 2–3” can follow soon after.

#	Item	Owner	Deadline
Website			
1	Update the plans page with the new subscription prices (PKR + USD) and the Founding Member offer	Growth Lead + tech	10 Nov
2	Add a **Surveys page**: packages, what's included, delivery times, prices, “Request a survey” form, sample report download	Growth Lead + tech	10 Nov
3	Hide or mark as “Coming soon” the marketplace, auctions and bidding text (the site currently says auctions are both live and not live)	Tech	8 Nov
4	Remove wording like “investment consultant” and the “Starter tier” mention; fix the Balochistan and province wording	Growth Lead	8 Nov
5	Add visible contact details: WhatsApp number, email, city or office address, and an “About us” section with names (people trust names)	Growth Lead	8 Nov
Sales materials			
6	One-pager (English) + Roman Urdu/Urdu version: who we are, two products, prices, contact	Growth Lead	9 Nov
7	10-slide pitch deck for meetings	Growth Lead	10 Nov
8	**Cleaned-up sample report** with a one-page plain summary and fixed tables (use a public or anonymised area, not a client's confidential report)	Tech + Growth Lead	10 Nov
9	Printed customer price sheet (section 18), business cards, QR code to free sign-up	Growth Lead	10 Nov
10	Demo account on a laptop and tablet that works offline or on mobile data	Tech	10 Nov
Money and paperwork			
11	Company bank account ready to receive PKR and USD (SWIFT); invoice template with NTN	Business Lead	10 Nov
12	Online payment for subscriptions (card, Raast, bank transfer), for example through a licensed payment provider	Tech	Week 2–3
13	Survey service agreement + NDA template + one-page proposal template	Business Lead (lawyer review)	11 Nov (draft)
14	Ask a tax adviser: sales tax on our services, and whether foreign survey sales qualify as IT exports (low tax, PSEB registration)	Business Lead	Week 2–3
Operations			
15	**Analyst capacity:** how many T1, T2 and T4 surveys can be delivered per month, on time? This sets our sales limit.	Tech	7 Nov
16	CRM tracker (Google Sheet): name, company, phone, source, interest, stage, next step, date, value	Growth Lead	8 Nov
17	WhatsApp Business account with catalogue, quick replies and a business email address	Growth Lead	8 Nov
18	Automated Free Snapshot ready to deliver within 48 hours	Tech	11 Nov

Questions to ask the tech and analyst team this week

1. How many surveys per month can we deliver on time, by package?
2. Can the Free Snapshot (automated 5 km report) be generated quickly for many leads?
3. Where does each satellite dataset come from, and are we allowed to use it commercially?
4. Do we have legal permission to show the licence (cadastre) data on the platform?
5. Can the platform enforce the new subscription tiers and AI limits?
6. Can we produce an Urdu one-page summary for reports?

11. PMIF26 (12–13 Nov): the launch event plan

↑ Back to contents

Pakistan Minerals Investment Forum 2026, Jinnah Convention Centre, Islamabad. It is organised by the government, endorsed by SIFC and partnered by OGDCL. Companies like Barrick, PMDC, FWO, PPL and NRL take part, along with foreign investors, universities and law firms. Almost every survey buyer on our list will be in one building. A booth may be too late to book, but **delegate passes and pre-booked meetings are not**. Confirm the dates and registration this week.

Before the event (4–11 November)

Task	Owner
Register delegate passes for both of us; ask about a small exhibition space or side-room	Business Lead
Make a list of 30 people and companies to meet (from the exhibitor and speaker list) and message them to book 15-minute meetings	Business Lead (Growth Lead researches contacts)
Prepare materials: 300 one-pagers, 300 cards with QR code, 20 printed sample-report summaries, demo tablet	Growth Lead
Set up a simple lead form (Google Form) for the “Free Ground Snapshot”	Growth Lead
Practise the 30-second pitch and the 3-minute demo together	Both
LinkedIn post: “Meet us at PMIF26”	Growth Lead

At the event (12–13 November)

- **Business Lead:** booked meetings, networking, government and company stands (PMDC, OGDCL, PPL, Mari, FWO, provincial mines departments, GSP, SUPARCO), and investors.
- **Growth Lead:** demos on the tablet, collecting Free Snapshot requests, attending technical sessions, posting live updates on LinkedIn.
- **Everyone we meet gets:** a one-pager, the Free Ground Snapshot offer and a QR code to a free account.
- **Each evening:** enter every contact into the tracker with notes and a next step.

After the event (14–27 November): the follow-up sprint

When	Action
Within 48 hours	WhatsApp/email every contact: thank you + Free Snapshot delivery or request
Within 1 week	Discovery calls with every serious survey lead; send proposals
Within 2 weeks	Close the first 2–3 Founding Survey Partners; LinkedIn post “What we learned at PMIF26”

PMIF success = 60+ contacts, 25+ Free Snapshot requests, 10+ survey discussions, 3+ proposals sent within 2 weeks.

12. The 90-day timeline, week by week

↑ Back to contents

Dates	Phase	Business Lead	Growth Lead
4–11 Nov (Week 1)	Get ready	PMIF passes, book 30 meetings, bank account, agreement template	Website fixes, new prices, surveys page, one-pager, deck, sample report, tracker, WhatsApp Business
12–13 Nov	**LAUNCH at PMIF26**	Meetings and networking	Demos, lead capture, live posts
14–30 Nov (Weeks 2–4)	Follow-up sprint	Discovery calls, proposals, close first 2–3 surveys	Deliver Free Snapshots, launch Founding Member offer online, start LinkedIn + YouTube
1–14 Dec (Weeks 5–6)	First deliveries	First results meetings; approach 2 associations (FMOA, APMIA) for a member deal	Quality check first reports; campus talks at 2–3 universities; first monthly demo webinar
15–31 Dec (Weeks 7–8)	Proof	Collect testimonials; meet cement and industrial groups	Publish first case study; Facebook/WhatsApp ad campaign in Urdu
1–11 Jan (Week 9)	International prep	Prepare for the Future Minerals Forum in Riyadh: Gulf investor list, meetings	USD investor pack (deck, price sheet, sample), LinkedIn outreach to Gulf and diaspora investors
12–14 Jan	Future Minerals Forum, Riyadh	Attend if budget allows, or book online meetings	Online campaign to Gulf investors
15–31 Jan (Weeks 11–12)	Scale what works	Push for the first USD survey; first Team/Enterprise subscription; sign 1 association MoU	Founding Member offer closes 31 Jan; double down on the best channel
2 Feb 2027	**90-day review**	Compare results against targets (section 13), adjust prices and offers, and decide on the next product (section 16). Consider Mining Indaba (Cape Town, 8–11 Feb) and PDAC (Toronto, 7–10 Mar) for international reach.	

13. Targets, tracking and weekly rhythm

↑ Back to contents

90-day targets

These are targets to agree together, not forecasts. “Base” is what we plan for; “stretch” is what happens if things go very well.

Measure	Low	Base	Stretch
Free accounts	400	**800**	1,500
Paid subscriptions	30	**60**	120
of which Explorer / Professional / Investor / Team	20 / 8 / 1 / 1	40 / 15 / 3 / 2	80 / 30 / 6 / 4
Survey conversations (named)	30	**50**	80
Survey proposals sent	8	**15**	25
Surveys sold	3	**6** (3 T1, 2 T2, 1 T4)	10
Case studies / testimonials	1	**3**	5
Association MoUs	0	**1**	2

What the base case earns

Item	Calculation (list price)	PKR
Explorer	40 × 6,000	240,000
Professional	15 × 35,000	525,000
Investor	3 × 120,000	360,000
Team	2 × 200,000	400,000
T1 Quick Screen	3 × 150,000	450,000
T2 Standard	2 × 400,000	800,000
T4 Full Package	1 × 1,000,000	1,000,000
Total at list price		**3,775,000**
After launch discounts (about 25% off)		**about 2,800,000**

Surveys bring about 60% of the money; subscriptions bring the audience. A single USD client (for example, a T4 at USD 12,000, about PKR 3.4M) would roughly double the total, which is why foreign clients are a priority.

Weekly rhythm (1 hour, every Monday)

Min	Agenda
10	Numbers: sign-ups, paid subscriptions, survey pipeline (Growth Lead presents the tracker)
20	Survey pipeline: each open lead, its next step, who and by when
10	Delivery: surveys in production, on time or not, quality issues
10	Marketing: what worked last week, what to post or do this week
10	Decisions and problems: anything needing the owner's decision or tech help

14. Budget (rough planning figures)

↑ Back to contents

These are **rough estimates for planning**, not quotes. Replace them with real quotes as we get them. Salaries and the tech team's costs are not included.

Item	Estimate (PKR)	Notes
PMIF26 delegate passes (2 people)	To confirm	Check the PMIF website this week
Printing: one-pagers, cards, sample summaries, standee	40,000–70,000	300 one-pagers, 300 cards, 20 booklets, 1 roll-up banner
Travel and stay, Islamabad	50,000–100,000	Depends on the city we travel from
Facebook, Instagram and LinkedIn ads (3 months)	90,000–150,000	PKR 30–50k a month, tested in small amounts
Video editing for YouTube (12 videos)	40,000–90,000	Freelancer, or do it ourselves on a phone
University visits and student ambassadors	30,000–60,000	Travel, snacks, free accounts
Lawyer: agreement, NDA, terms review	50,000–150,000	One-time
Tax adviser	25,000–75,000	One-time set-up advice
Software: WhatsApp Business, email domain, CRM, design tools	15,000–30,000	Mostly free or low cost
Future Minerals Forum, Riyadh (optional)	400,000–800,000	Only if survey pipeline justifies it; otherwise do online meetings
Total without Riyadh	**about 340,000–725,000**	Covered by about 1–2 survey sales

15. Risks and how we handle them

↑ Back to contents

Risk	What could happen	How we handle it
We sell more surveys than we can deliver	Late reports, angry first clients	Agree a monthly capacity with the analysts; never promise faster than standard time; use Express only when capacity exists
A survey finds “no target”	Client feels the money was wasted	Set expectations upfront; explain the money saved on fieldwork; offer a discount on the next block or a free Professional year
Someone challenges our claims	A client or official points to Fleet Space, Farmonaut or SUPARCO	Never claim to be the only one. Our claim is “integrated, Pakistan-specific, bilingual, transparent prices”
Prices feel too high to locals	Few sales from small owners	Lead with T1 and Explorer; founding discounts; association rates. Don't cut USD prices for foreigners.
Late payment by companies	Cash-flow problems	Advance payment rules (100% for T1; 50% for T2+); no report released until final payment
Client data leaks	Loss of trust, legal problems	NDA with every survey client; never post client areas; access control on files
Website still has old or wrong information	Confuses buyers, looks unprofessional	Readiness checklist items 1–5 before PMIF
Licence data accuracy	A client relies on outdated licence info	Show the data date on every map and report; say “confirm with the Mines Department”
Security in field areas (later)	Staff or partner safety	For now we work remotely; field work only through vetted local partners
Too many things at once	Team spreads too thin	Stick to the two products for 90 days. New ideas go on a “later” list.

16. After 90 days: when we add the next products

↑ Back to contents

We add products step by step, **only when the previous step is working**. These are the triggers.

Order	Next product	Why this order	Start when…
1	**Compliance and licence reports**	Uses the same licence and law data we already have; easy to sell to the same clients and mine owners	5+ surveys delivered on time, 50+ paid subscribers, licence data legally cleared
2	**Location reports sold one by one** (5 km briefs)	Already built for the Free Snapshot; becomes a paid product	Snapshot demand proves people value it
3	**Government pilot**	Start with a free MoU or pilot (for example SUPARCO, GSP, or one province), then a paid data licence	2–3 case studies to show; relationships from PMIF
4	**Marketplace** (verified sellers and buyers)	Needs escrow, a payment partner, a lab-testing partner and legal set-up	Escrow partner signed; 20+ verified licence holders ready to list
5	**Gemstone auctions**	Needs a custody and authentication partner	Partner agreement signed; marketplace running

17. Toolkit: pitches, scripts, objections, templates

↑ Back to contents

30-second pitch (English)

> *“PakGeoLith is Pakistan's integrated mineral-intelligence platform. We combine satellite analysis, geology maps, mining-licence records and mining law in one place. Before you spend millions on fieldwork, we screen your ground from space and tell you honestly where it's worth looking, and where it isn't. Reports start at PKR 150,000 and are delivered in days. Can I show you your area on the map?”*

30-second pitch (Roman Urdu)

> *“PakGeoLith Pakistan ka integrated mineral-intelligence platform hai. Hum satellite data, geology maps, mining licence records aur mining qawaneen ko ek jagah jama karte hain. Field par lakhon rupay kharch karne se pehle hum satellite se aap ki zameen ka jaiza lete hain aur imandari se batate hain ke kahan dekhna faida mand hai aur kahan nahi. Report PKR 1.5 lakh se shuru hoti hai aur chand dinon mein mil jati hai. Kya main aap ka area map par dikhaun?”*

Discovery questions for surveys

1. Where is the land? Do you have a licence number or a Google Earth boundary?
2. Which minerals are you interested in?
3. What decision are you trying to make: buy, sell, invest, explore, or find a partner?
4. What do you already know about the area (old reports, samples, workings)?
5. When do you need an answer?
6. Who else is involved in the decision?
7. Have you budgeted for fieldwork? (This helps us show the value of screening first.)

Handling common objections

They say…	We answer…
“Can satellites find gold or copper?”	“Not directly, and anyone who says so is not being honest. Satellites map the rocks and alteration that these metals are found in. That tells you where to focus your field budget.”
“It's too expensive.”	“A ground survey of the same area costs 10 to 50 times more. Our report tells you whether that spend is worth it. You can start with a Quick Screen at PKR 150,000.”
“Satellite data is free, why pay you?”	“The pictures are free; the expertise isn't. We process several satellites, test the results statistically, add licence and legal checks, and explain it in plain language, in days.”
“The government has its own satellite now.”	“Yes, SUPARCO's HS-1 is great for Pakistan. We focus on turning data into decisions for a specific licence, and we can work with any data source.”
“What if you find nothing?”	“Then you've saved the cost of fieldwork on the wrong ground, and you get a clear recommendation on what to do next. We will always tell you the truth.”
“Is my information safe?”	“We sign an NDA before we start, and we never share or publish your area.”
“I'll think about it.”	“Of course. Let me send you a free snapshot of your area in 48 hours, so you can see what we do first.”

WhatsApp follow-up after a meeting

> *Assalam o Alaikum [Name], it was great meeting you at [place]. As promised, here is PakGeoLith's one-pager. Please send me your licence number or Google Earth boundary and we'll send you a **free Ground Snapshot within 48 hours**. You can also open a free account here: [link]. — [Name], PakGeoLith*

Email: proposal cover note

> *Dear [Name], thank you for your time. Based on our discussion about [area / mineral / decision], we recommend our **[T2 Standard Survey]**. It covers [area] and will be delivered within [10] working days of receiving your boundary file and the advance payment. The price is PKR [400,000] (50% to start, 50% on delivery) and includes a results meeting with our analyst and one year of Professional platform access. The proposal is attached. I'm happy to answer any questions. Kind regards, [Name]*

What to say, and what never to say

Say

- “Pakistan's integrated mineral-intelligence platform”
- “Screen before you spend”
- “Honest results, including when nothing stands out”
- “Geology, licences, law and satellites in one place”

Never say

- “The only one in the world”
- “We detect gold or platinum from space”
- “Guaranteed”, or quoting reserves or values
- “Investment advice”

18. Customer price sheet (hand-out)

↑ Back to contents

This page can be printed and given to customers. Prices are launch prices. PKR prices exclude applicable sales tax. USD prices apply to clients outside Pakistan.

Subscriptions

Package	For	PKR / year	PKR / month	USD / year
Free	Getting started	0	0	0
Explorer	Students, small owners	6,000	600	120
