LISTING AUDIT & OPTIMIZATION

The Jade Retreat

A deep-dive audit of a 5.0 Guest-Favourite 3-bedroom in Lahore — what's already winning, the accuracy gaps quietly costing bookings, and a ready-to-paste rewrite. (Photos excluded — you're handling those.)

01 — THE VERDICT

Great concept, leaky execution

A fun, differentiated home — green "retreat" theme plus in-home arcade games — with a perfect 5.0 and Guest-Favourite badge. But the listing under-sells itself badly: a broken-looking title, a thin amenity list, and (most damaging) **core essentials switched off** that make a 7-guest booking feel risky. These are quick wins.

5.0	3	13	80%
Overall · 100% 5★	Reviews (new)	Amenities (too few)	Host response rate

Cleanliness 4.3 · Accuracy 5.0 · Check-in 5.0 · Communication 5.0 · Location 5.0 · Value 5.0

Cleanliness (4.3) is the one category pulling below perfect — worth watching with so few reviews, since one soft turnover now shapes the average.

✅ What's already working — protect it

- **5.0 overall + Guest Favourite** on a new listing — strong early trust signal.
- **A real differentiator** — the green/planter aesthetic and in-home arcade games give you something most Lahore 3-BRs don't. Lean into it.
- **Genuine group appeal** — 3 bedrooms, sleeps 7, dedicated workspace, free parking, AC throughout.
- **Safety kit present** — smoke & CO alarms, fire extinguisher, exterior cameras. Host responds within an hour.

🎯 The five highest-impact fixes

1. **Turn on the essentials.** Hot water, Essentials (towels/sheets/soap) and laundry are marked unavailable — fix immediately; these sink 7-guest bookings.
2. **Rewrite the broken title** (the trailing "| `Arcade` |" looks buggy) — §3.
3. **Expand the amenity list** from 13 to everything the home truly has, and add a self check-in method.
4. **Show how 7 people sleep** — 3 beds for 7 guests needs a sleeping breakdown + a full, rewritten description (§3).
5. **Lift response rate to 90%+** to unlock Superhost and stop the ranking drag.

02 — AUDIT: WHAT'S WRONG

Findings, by impact

Critical = costs bookings / accuracy risk. Fix = conversion. Polish = quality & ranking.

Critical **Core essentials are switched OFF.** The amenities mark **Hot water**, **Essentials** (towels, sheets, soap, toilet paper) and **Washer/Dryer** as unavailable. For an entire 3-bedroom home that sleeps 7, "no hot water / no towels" reads as either broken or bare — a direct booking killer and almost certainly a checkbox error. **→ Turn Hot water and Essentials on now; add laundry if it exists (or state the arrangement). This likely also lifts the cleanliness/value scores.**

Critical **Only 13 amenities listed for a 7-guest, 3-BR "luxury" home.** Guests filter by amenity; an under-filled list makes you invisible in search and look sparse next to competitors. Missing obvious items a home like this surely has — bed linens, extra pillows/blankets, cooking basics, refrigerator, microwave, dishes & cutlery, hair dryer, iron, hangers, elevator, Smart TV. **→ Add every true amenity; aim for 30+.**

Critical **Title looks broken.** `The Jade Retreat 3BHK | Arcade |` ends in empty pipes and buries the hook behind jargon. The title is the one line guests see in search.

> Current: "The Jade Retreat 3BHK | Arcade |"

→ "Jade Retreat · Green 3BR with Arcade Games" (§3).

Fix **No self check-in method shown.** For a remotely-managed rental there's no keypad / smart lock / lockbox amenity, so guests can't see how they'll get in. **→ Add the self check-in amenity; it's both a filter and a reassurance.**

Fix **7 guests, 3 beds, no sleeping breakdown.** Nothing shows how seven people actually sleep (sofa beds? extra mattresses?). Groups booking for 7 need to see 7 sleeping spots, or they bounce. **→ Add a sleeping-arrangement section + describe it in the copy (§3). Also confirm 1.5 baths is right for 7.**

Fix **Description is thin, generic and has a grammar slip.** Three short paragraphs of "nature-inspired vibe" filler; the arcade (your best hook) gets one line, and there's a fragment:

> "...comfortable bedrooms, a bright living area." — and the location is never mentioned.

→ Use the full rewrite in §3; add the neighbourhood + nearby landmarks.

Fix **Response rate 80% — below the Superhost bar.** That's why there's no badge despite a 5.0, and it's a ranking/trust drag. **→ Notifications on, reply within the hour, hold ≥ 90% for a quarter to earn Superhost.**

Polish **Confirm the Pool, and reconsider "Smoking allowed."** Verify the Pool is genuinely available before leaving it listed (don't advertise what you can't deliver). "Smoking allowed" filters out many families/groups — your core audience here. **→ Verify Pool; consider smoking "outdoor/balcony only."**

Polish **Heating unavailable & vague "guest access."** No heating is a winter objection in Lahore (Dec–Jan); a portable heater listed removes it. The guest-access text ("clear instructions provided") is

generic. → **Add heating if available; tighten guest-access copy (§3).**

LOCATION — FILL THIS IN (CURRENTLY BLANK)

Add area + 3–5 landmarks with drive times, e.g.: "Located in `[DHA / Bahria Town / Gulberg]`, minutes from `[mall]`, `[cafés]` and `[park]`; about `[X]` min to Allama Iqbal International Airport."

04 — DO THIS, IN ORDER

Action checklist

Sequenced by impact-per-effort. Steps 1–4 are a single sitting in your listing editor.

1. **Turn essentials back on** — Hot water, Essentials (towels/sheets/soap), and add laundry if it exists. Critical · today
2. **Expand amenities to 30+** and add the **self check-in** method. Critical
3. **Fix the title** — paste the new one; drop the empty pipes and "3BHK." High
4. **Paste the new description** and add the sleeping breakdown, checkout time and location. High
5. **Confirm Pool** is real; decide on smoking policy; add heating if available. Accuracy
6. **Lift response rate to 90%+** and watch cleanliness on the next turnovers to protect the 5.0 → earn Superhost. Ranking
7. **Your part:** finish the photo set — hero the green/arcade look, show all sleeping spots and each bedroom. In progress

Bottom line

The product and the reviews are strong — the listing just isn't presenting them. Switching the essentials back on, filling out the amenities, and fixing the title + description removes every "is this place actually fully equipped?" doubt a 7-guest group has before booking. Pair that with your new photos and this becomes a standout group listing in Lahore.
